The Inquisity Club

Who and What are We?

The Inquisity Club is formed by a team of students from School of Mechanical Engineering, REVA University. This club is a platform that provides, students to students connection and interactions to share their knowledge & wisdom.

Why we are and why did we form?

- This club is for everyone as we all are Inquisitive.
- This club is formed to give equal opportunities, to meet a diverse population of people that helps to enhance our knowledge, thoughts & interests
- There is a lack of interactions among juniors, seniors, and other branch students, this Club will curb the gap & create strong bonding that helps in creating great future
- Every student possesses some knowledge & experience on some fields of his/her interests. The Club is here to give "You" an opportunity to share your knowledge, wisdom & expertise on your fields of interest to all other students of the university. This would help everyone learning something new.

The Inquisity Club

The Inquisity Club

Vision:

"The club aspires to create an interactive space wherein students create, deliver, discuss among themselves to provide new solution for engineering problems."

Mission:

- 1) To create and provide "students to students" connecting platform where students can share their knowledge and wisdom to other students in the form of Technical talks, Seminars, Webinars, Workshops, Activities etc. And to have Alumni talks for guiding students for nurturing their future.
- 2) To ensure students, irrespective of branch, should stay updated on new technologies, research works, projects based on current technologies etc.
- 3) To develop strong bonding and interaction among all the students of all semesters which helps them to create new ideas, projects etc on the present problems that world is facing.

How this club benefits students?

- **Personality Development-** Since our presenters are mostly students, this can help them in developing one's public speaking skills, presentation skills, and making their basics & concepts stronger
- **Extra-Curricular Activities** (Trainings, Workshops, Competitions etc.)
- **Building a strong network** in and outside the campus
- **Leadership Skills-** Once you become member of the club you will be able to learn how to organize the things, events and people, learn how to talk to unknown people for a better purpose which leads to develop one's leadership qualities within an environment
- Every student who makes use of our activities, can stay updated to current technologies & can develop inter and intrapersonal skills of an individual
- It helps to find likeminded person like you. This also helps in building like-minded people ecosystem
- Get certifications for taking part in our certification activities
- Learning becomes easy from a friend.

MESSAGE FROM THE CLUB TEAM:

Now-a-days rise in technologies across all the fields is in the form of an exponential curve, Everyday new technologies being developed, discovered, & invented, but are unheard and unaware, mostly by the students. We need some blended knowledge for our respective stream. And many students are facing some difficulties in developing their inter and intrapersonal skills which are very important for overall development of a student.

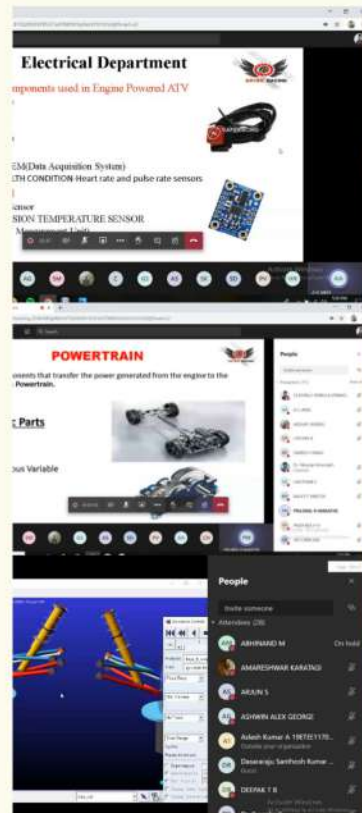

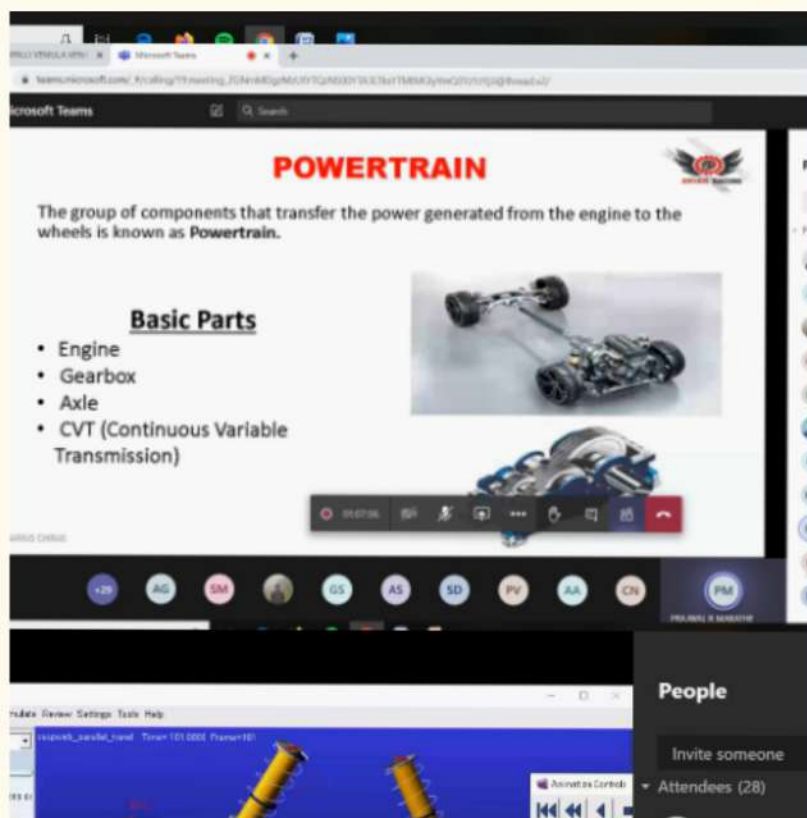

Keeping those things as motive & objective this club is originated. We try to curb the gap b/w technologies & academia. We help in building and developing interpersonal skills by giving opportunities to share their knowledge.

“Please make use of our activities which helps in developing each other and lead to sustainable development of student community.”
